

Amherst Walkie Talkie Radio Centre Hytera PD705 Digital Professional UHF Radio For Hire

Below are some more pictures of our standard Kirisun PT4200 walkie-talkie hire radio.

The radios are very simple to use, with just a rotary on/off and volume control and a rotary channel selector.

They also have a strong spring-loaded belt-clip on the back so the user can attach the radio to the belt or pocket.

There is a connector to attach earpiece/microphones and headsets etc.

We have a wide range of earpiece/microphones, headsets and speaker / microphones to go with the Hytera PD705 walkie-talkies.

We can also provide spare batteries if necessary, that can be charged separately from the radios, so that you can have a charged-up battery ready to be quickly swapped for a "flat" battery to keep your radios in use 24/7 if required.

A PD705 radio is shown here next to a soft drink can to show its size.
